SUMMARY

Full-stack Software Engineer with 2 years of enterprise experience building secure, accessible cloud-native and SaaS applications in **Azure Cloud** using **React**, **TypeScript**, **Next.js**, **Python Flask**, **REST APIs**, **SQL**, and **C#/.NET**. Experienced in requirements analysis, modular development, automated testing, code reviews, CI/CD, Kubernetes, and defect resolution in a regulated public-sector environment. Collaborative and adaptable in fast-changing delivery.

EXPERIENCE

I&IT Technology Specialist May 2025 - Oct 2025
Ontario Public Service *Toronto, ON*

- Analyzed requirements, broke features into sprint tasks, estimated effort, and developed **React** features using **component design**, **Redux state management**, **responsive UI**, **TypeScript**, and **Next.js** for BXP, a cloud-native enterprise **SaaS platform in Azure Cloud** integrated with distributed services.
- Built reusable UI components from **Figma** designs with **Tailwind CSS**, **Storybook**, and the **Ontario Design System**, meeting **WCAG AA/AODA accessibility** standards validated with **NVDA**, **Axe DevTools**, and **Lighthouse**.
- Integrated **REST APIs** and **JSON** data across **Azure Cloud** environments, tested endpoints with **Postman**, handled loading and error states, and performed root cause analysis for defects spanning UI, API, database, and environment layers.
- Worked **cross-functionally** with managers, senior managers, project managers, developers, senior developers, designers, QA, DevOps, and other **technical and non-technical stakeholders**; communicated clearly and delivered amid shifting priorities, **ambiguity, and rapid change**.
- Managed source code and Git workflows in **Azure DevOps** using feature branches, work items, pull requests, and mandatory **code reviews**; wrote **Jest** unit tests and supported integration, regression, and UAT testing within Agile/Scrum.
- Used **Microsoft Copilot** for AI-assisted code exploration, debugging, testing, and documentation, validating suggestions against requirements, security expectations, and team standards.

I&IT Technology Analyst/Developer Co-op Jan 2024 - Apr 2025
Ontario Public Service *Toronto, ON*

- Developed full-stack, microservice-oriented components using **React**, **Python Flask**, **REST APIs**, and **MySQL**, including registration, authentication, role-based navigation, schema design, indexing, and data validation.
- Containerized services with **Docker** and deployed to **Azure Kubernetes Service**; built **GitHub Actions** and **Azure DevOps** pipelines that automated builds, tests, linting, and deployments across development and test environments.
- Owned delivery of a SharePoint administration solution: gathered requirements from non-technical users, recommended the architecture, mentored a peer developer, built an **SPFx** mapping app with **TypeScript** and **Leaflet.js**, and prepared UAT and handover documentation.

PROJECTS

SoundHouseFun | C#/.NET, ASP.NET MVC, Entity Framework, SQL Server, OAuth 2.0, Stripe

- Built a full-stack **C#/.NET** application with **ASP.NET MVC**, **Entity Framework**, and **SQL Server**; implemented MVC controllers, server-side data access, Google OAuth 2.0, RBAC, Stripe payments, and database integrity controls.

TECHNICAL SKILLS

Full Stack: React (component design, Redux state management, responsive UI), Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, Storybook, C#/.NET, ASP.NET MVC, Python Flask, Node.js
APIs & Data: REST APIs, JSON, XML, Postman, Entity Framework, MySQL, PostgreSQL, SQL Server, MongoDB, SQL, schema design, indexing
Testing & Quality: Jest, unit/integration/regression/system testing, UAT, code reviews, defect triage, root cause analysis
Cloud & DevOps: Azure Cloud, Azure DevOps Repos and Pipelines, Docker, Kubernetes/AKS, GitHub Actions, CI/CD, Git, Vite, Vercel, deployment validation
Architecture: Cloud-native systems, SaaS, microservices, distributed services, REST APIs, full SDLC
Security & Accessibility: OAuth 2.0, OpenID Connect, JWT, RBAC, input validation, OWASP basics, WCAG AA, AODA, ARIA
Methods & Tools: Agile/Scrum, requirements analysis, estimation, Jira, Figma, Microsoft Copilot, documentation
Certifications: Microsoft AZ-900, AI-900, SC-900, DP-900

EDUCATION

Advanced Diploma, Computer Programming and Analysis; GPA: 4.68 | *Georgian College* Sep. 2022 - Apr. 2025
