Anton Korchynskyi

St. Catharines, ON | anton.korchynskyi28@gmail.com| (905) 328-3656

Highlights of Qualifications

- I&IT Technology Analyst/Developer at the Ministry of Public and Business Service Delivery and Procurement (Government Services Integration Cluster) from January 2024 to October 2025, supporting digital modernization and cloud transformation initiatives across enterprise platforms.
- Experienced in full-stack and DevOps development using Next.js, React, Node.js (Express), C#, Python, JavaScript, TypeScript, and Azure Cloud services.
- Led the design and implementation of scalable, secure, and accessible digital solutions using Agile methodologies and iterative delivery practices.
- Hands-on experience developing microservice-based architectures with Docker containers and Kubernetes (AKS) for resilient cloud deployments.
- Applied DevOps principles using Azure DevOps and GitHub Actions to automate build, test, and deployment pipelines, reducing release times and improving consistency.
- Strong database expertise (MySQL, Azure SQL, Oracle, MS SQL, MongoDB) including schema design, normalization, indexing, and performance optimization.
- Deep understanding of OPS web standards, accessibility (AODA/WCAG), and Ontario Design System compliance for inclusive, user-centered interfaces.
- Collaborative communicator experienced in coordinating with architects, QA, and business teams to define requirements, evaluate technical options, and deliver secure, reliable, and standards-compliant services.

Technical Skills

- **Languages:** TypeScript, JavaScript, C#, Python, Java, SQL
- **Frameworks:** Next.js, React, ASP.NET, Node.js (Express), Java (Spring Boot), Angular
- **Databases:** Azure SQL, MySQL, MS SQL, Oracle, MongoDB, SQLite
- **Cloud & DevOps:** Azure Cloud, Docker, Kubernetes (AKS), Azure DevOps, GitHub Actions, Azure CLI
- **Data & Analytics:** Power BI, Jupyter Notebook, pandas, NumPy
- **Tools:** SharePoint, Power Apps, Power Automate, Jira, Visual Studio, Git
- **Methodologies:** Agile (Scrum/Kanban), CI/CD, Test-Driven Development, Continuous Monitoring

Work Experience

I&IT Technology Analyst/Developer (Co-op)

Ministry of Public and Business Service Delivery and Procurement of Ontario

January 2024 – October 2025

1. Business Experience Platform (BXP)

Front-end development | accessibility compliance | CI/CD | Agile delivery

- Developed accessible, modular front-end components using Next.js and React, fully compliant with AODA, WCAG and aligned with the Ontario Design System (ODS).
- Implemented keyboard navigation, ARIA patterns, responsive layouts, and component behaviour, working closely with UI/UX designers and accessibility specialists.
- Participated in Agile Scrum delivery, supporting sprint planning, backlog refinement, estimation, and cross-functional decision-making.
- Authored technical documentation, component specifications, and integration guides to support maintainability and long-term platform evolution.
- Assisted with technical feasibility reviews and proof-of-concept development to validate front-end architecture and performance approaches.
- Collaborated with backend and DevOps teams to ensure service integration, accessibility testing, and standards alignment across the platform.

2. ServiceOntario Account for Business (SOAB) eForms Integration Proof of Concept

Cloud microservices | MySQL | Docker/AKS | React | DevOps automation

- Developed cloud-based microservices using Node.js, React, JavaScript, and Azure Cloud, integrating securely with MySQL for data storage and validation.
- Built containerized services with Docker and deployed them to AKS (Azure Kubernetes Service), contributing to a scalable and resilient architecture.
- Designed and optimized MySQL schemas, indexes, and queries to improve performance, reliability, and secure data handling.
- Built and enhanced CI/CD pipelines using GitHub Actions and Azure DevOps Pipelines, automating builds, tests, linting, and multi-environment deployments.
- Supported secure cloud hosting, environment configuration, and compliance with OPS security and privacy requirements.
- Conducted technical feasibility assessments, validating architectural decisions before full-scale implementation.
- Coordinated with architects, QA teams, and product owners to refine requirements, ensure integration readiness, and resolve technical blockers.

Education

Computer Programming and Analysis Advanced Diploma Program | Georgian College | Barrie, Ontario
September 2022 – April 2025 | GPA – 93.22 (4.68)

Technical Certifications

- **AZ900 – Azure Cloud Fundamentals** (Microsoft)
- **AI900 – Azure AI Services** (Microsoft)
